

OPTIONS AND SPECIFICATIONS FOR OUR GAS STOVES

FITTINGS OPTION FOR THE WHITBY

FITTINGS OPTION FOR THE KIRKDALE

REMOTE CONTROL OPTION

The remote control is an option on both our gas stoves. It doesn't require mains power as it is battery operated by a 9v and 4 x AA batteries (supplied).

STOVE COLOUR OPTIONS

Our Stoves and flue pipes come as standard in black but the whole range is available in the colours shown below at a small extra charge.

The special paint we use is extremely resistant to high temperatures.

Our Whitby Stove finished in Sky Blue.

Your local approved stockist will be able to advise you on suitability and installation. They will also be able to supply you with any spares in the future.

THE WHITBY

The Whitby natural gas stove combines the appeal of a real fire with the control and convenience of gas, giving instant warmth from realistic coal or log effect fire. The large glass door gives a wonderful view of the new fuel bed.

A very efficient stove with built in safety features including a thermal cut-out.

Although a larger stove, the input is 6.8kW, so there is normally no need for any extra air vent, but still a good output of 5.4kW, giving an amazing 80% efficiency.

The Whitby - showing the random coal effect option.

- Natural gas
- Driftwood or coal effect
- Manual or remote control option available
- 80% efficiency
- British made
- Hidden front control

THE KIRKDALE *with optional flat or curved door*

The Kirkdale is a natural gas stove which will look at home in a traditional or contemporary room.

Made to suit either Class1 or Class2 flues, the flue outlet can be from the top (5" diameter), or from the rectangular spigot from the rear, for use in pre-cast flue blocks with the closure plate supplied.

The Kirkdale is fitted with a thermal cut-out for your safety in down draft situations.
