

“Timeless & hand-made quality for authentic style”

“Brick-boards” are a composite cladding panel, made from real beautiful hand-made bricks & 'O' rated cement particle fire-board specially designed for fireplace openings & stoves. We use only the highest quality bricks that have been selected for their natural reclaimed appearance, because we understand that detail is important to our customers we finish each panel by hand pointing with traditional conservation mortar for a truly authentic finish. This makes them indistinguishable from traditional brickwork yet they can be fitted in a fraction of the time.

Standard brick bond chamber set & trim shown with “Byron” solid oak mantle & limestone hearth.

Rustic red chamber set, half brick columns, oak beam and slate hearth

Our standard chamber set with return corners, for a truly authentic looking brick feature fireplace.

Alternatively use an oak beam to create a traditional inglenook adding character to any room.
